### 平成30年度金沢医科大学医学部入学試験問題 一般入学試験前期(英語)

#### 注意事項

- 1. 試験開始の合図があるまで、問題を見てはいけません。
- 2. 解答用紙には解答マーク欄以外に受験者氏名などの記入欄があるので、監督員の指示に従って正しく記入、マークしてください。
- 3. 解答は設問ごとの指示に従いマークをしてください。複数選択の指示がある場合は、同一の解答欄に複数マークしてください。指示する解答数を超えてマークをしたり、マークをしない場合は.0点となります。
- 4. 試験中, 問題用紙の白紙, 印刷不鮮明, 頁の落丁・乱丁等に気づいた場合は, 手を挙げて監督員に 知らせてください。
- 5. 試験終了後、問題用紙は持ち帰らないでください。

#### 記入上の注意

解答用紙はコンピューター処理するので次の注意を守ってください。

- ・記入は、HBの鉛筆またはシャープペンシルを使用してください。
- ・消す時は、消しゴムで完全に消してください。
- ・用紙を破損したり、折り曲げたり、汚したり、消しくずを残したりしないでください。

#### <受験番号・受験番号マーク欄の記入例>

		① Otherwise,	② However,	③ As a result,	④ On the contrary,	(5) Because		
2		he passage below and an or implied in the passage.	swer the questions	8 - 16 abo	out it. <u>Answer all ques</u>	tions based on what is		
	Since the dawn of time, people have thought differently, acted differently, and lived differently from each other. It was guaranteed that someone would ask the question of why people differed—why some people are smarter or more moral-and whether there was something that made them permanently different. Experts 8 up on both sides. Some claimed that there was a strong physical basis for these differences, making them unavoidable and unalterable. Through the age these <1>alleged physical differences have included phrenology and craniology*, and today, genes.  Others pointed to the strong differences in people's backgrounds, experiences, training, or ways of learning. It may surprise you to know that a big champion of this view was Alfred Binet, the inventor of the IQ test. Wasn't the IQ test meant to summarize children's unchangeable intelligence? In fact, no. Binet, a Frenchman working in Paris in the ear twentieth century, designed this test to identify children who were not profiting from the Paris public schools, so that ne educational programs could be designed to get (7)them back on track. Without denying individual differences in children intellects, he believed that nurture (education and practice) could <2>bring about fundamental changes in intelligence. Here is a quote from one of his major books, Modern Ideas About Children, in which he summarizes his work with hundreds of children with learning difficulties:  A few modern philosophers 9 that an individual's intelligence is a fixed quantity, a quantity which cannot be increased. We must protest and react against this brutal pessimism* With practice, training, and above all, method, we manage to increase our attention, our memory, our judgment and literally to become more intelligent than we were before.							

Who is right? Today most experts agree that it's not either—or. It's not nature or nurture, genes or environment. From conception on, there's a constant give and take between the two. In fact, as Gilbert Gottlieb, a famous and respected neuroscientist, put it, not only do genes and environment cooperate as we develop, but genes require input from the environment to work properly.

## 平成30年度金沢医科大学医学部入学試験問題 一般入学試験(前期)(英語)

1. For 8 - 11 in the passage, choose the most appropriate word from each list.  8	At the same time, scientists are learning that people have more 10 for lifelong learning and brain development than they ever thought. Of course, each person has a unique genetic endowment*. People may start with different characters and different talents, but it is clear that experience, training, and personal effort take them the rest of the way. Robert Sternberg, the present day leader in the field of intelligence research, writes that the major factor in whether people achieve expertise is not some fixed prior ability, but purposeful engagement. Or, 11 Binet recognized, it's not always the people who start out the smartest who end up the smartest. 注*: phrenology and craniology 骨相学や頭蓋学; brutal pessimism 厳レい悲観主義; genetic endowment 遺伝的資質							
Second   Grown   Gro	1. For 8	11 in t	he passage, choos	e the most ap	propriate word	from each list	5.	
12   (1) alleged	9	① command ① capacity	② afford ② volumes	<ul><li>③ execute</li><li>③ fields</li></ul>	4 admir 4 substa	nister G	) assert ) medic	; ines
3. What does (7) them refer to? Choose ONE answer from the list.  14 ① backgrounds, experiences, training ② ways of learning ③ children ② public schools ⑤ individual differences ⑥ children's intellects  4. For the questions 15 and 16 choose ONE answer from each list.  15 Why would a reader of this article be surprised about Alfred Binet?  ① Because it is commonly believed that his IQ test measures unchangeable intelligence, even though he thought intelligence could be improved. ② Bacause he invented the IQ test to measure children's intelligence and made a profit by using it in the Paris public schools. ③ Because his IQ test was originally designed to show that education and practice do not have a strong effect on intelligence. ④ Because he strongly claimed that we are able to become more intelligent through protest and reaction to differences. ⑤ Because he was not the only person who wrote that people born with high intelligence should not be called the smartest people.  16 What is the current belief about the cause of the differences between people?  ① It is caused by he genes and environment. ④ It is caused by he genes and environment. ④ It is caused by conception and cooperation. ⑤ The cause of the differences hasn't been discussed.  Read the passage below and answer the questions 17 - 30 about it. Answer all questions based on what is stated or implied in the passage.  The body is a complex organism that has the ability to heal itself, 17 you listen to it and respond with proper nourishment and care. In spite of all the abuse our bodies endure, whether through exposure to environmental toxine, poor nutrition, cigarette smoking, alcohol consumption, or inactivity, they still usually serve us well for many years before signs of illness may start to appear. Even then, with a little help, (7) they respond and continue to function.  The human body is the greatest machine on earth. Nerve signals travel through muscles at speeds as fast as your eye muscles, you could walk really fast. 《 ① 》 According to scientist	2. For <b>&lt;1&gt;</b> <u>a</u>	<u>lleged</u> and <b>&lt;2&gt;</b> bri	ng about, choose	ONE answer t	hat is closest i	n meaning in o	context	from each list.
14 ① backgrounds, experiences, training ② ways of learning ③ children ② public schools ⑤ individual differences ⑥ children's intellects  4. For the questions 15 and 16 choose ONE answer from each list.  15 Why would a reader of this article be surprised about Alfred Binet?  ① Because it is commonly believed that his IQ test measures unchangeable intelligence, even though he thought intelligence could be improved. ② Because he invented the IQ test to measure children's intelligence and made a profit by using it in the Paris public schools. ③ Because his IQ test was originally designed to show that education and practice do not have a strong effect on intelligence. ④ Because he strongly claimed that we are able to become more intelligent through protest and reaction to differences. ⑤ Because he was not the only person who wrote that people born with high intelligence should not be called the smartest people.  16 What is the current belief about the cause of the differences between people?  1 It is caused by either nature or nurture. ② It is caused by heither nature or nurture. ③ It is caused by conception and cooperation. ⑤ The cause of the differences hasn't been discussed.  Read the passage below and answer the questions 17 - 30 about it. Answer all questions based on what is stated or implied in the passage.  The body is a complex organism that has the ability to heal itself, 17 you listen to it and respond with proper nourishment and care. In spite of all the abuse our bodies endure, whether through exposure to environmental toxins*, poor nutrition, cigarette smoking, alcohol consumption, or inactivity, they still usually serve us well for many years before signs of illness may start to appear. Even then, with a little help, (***) they respond and continue to function.  The human body is the greatest machine on earth. Nerve signals travel through muscles at speeds as fast as your eye muscles, you could walk really fast. 《 ① ** According to scientists, bone is among the strongest building materials known to hu				_	_			_
## Public schools	3. What do	es <b>(ア)</b> them refer	to? Choose ONE a	inswer from th	ıe list.			
15 Why would a reader of this article be surprised about Alfred Binet?  ① Because it is commonly believed that his IQ test measures unchangeable intelligence, even though he thought intelligence could be improved. ② Because he invented the IQ test to measure children's intelligence and made a profit by using it in the Paris public schools. ③ Because his IQ test was originally designed to show that education and practice do not have a strong effect on intelligence. ④ Because he strongly claimed that we are able to become more intelligent through protest and reaction to differences. ⑤ Because he was not the only person who wrote that people born with high intelligence should not be called the smartest people.  16 What is the current belief about the cause of the differences between people? ① It is caused by either nature or nurture. ② It is caused by neither nature or nurture. ② It is caused by noneption and cooperation. ⑤ The cause of the differences hasn't been discussed.  Read the passage below and answer the questions 17 - 30 about it. Answer all questions based on what is stated or implied in the passage.  The body is a complex organism that has the ability to heal itself, 17 you listen to it and respond with proper nourishment and care. ### 平成 30 年度 金沢医科大学医学部入学試験問題 一般入学試験(前期)(英語)

Individual nutrients differ in form and function, and in the amount needed by the body; however, they are all vital to our health. The actions that involve nutrients 20 on microscopic levels, and the specific processes differ greatly. Nutrients are involved in all body processes, from fighting infection to repairing tissue to thinking.   Although							
nutrients have different specific functions, their common function is to keep us going.  Research has shown that each part of the body contains high concentrations of certain nutrients. A deficiency of those nutrients will cause the body part to function abnormally and eventually break down, and, like dominos, other body parts will follow.   Brain function, memory, skin elasticity*, eyesight, energy, the ratio of fat tissue to lean tissue in the body, and overall health are all indications of how well the body is functioning. With the help of the proper nutrients, exercise, and a banced diet, we can slow the aging process and greatly improve our chances for a healthier, pain-free,							
If we do not give ourselves the proper nutrients, we can (4)!							
missing from today's diet.  The past decade has brought to light much new knowledge about nutrition and its effects on the body, and the role it plays in disease. Phytochemicals* are one example of the results of this research. Phytochemicals are compounds present in plants that make the plants biologically active. All fruits and vegetables contain phytochemicals. However, since few people eat enough fruits and vegetables to get the ideal amount of phytochemicals from diet alone, it is recommended to take some supplements. Phytochemicals are not nutrients in the classic sense, but they determine a plant's color, flavor, and ability to resist disease. Researchers have identified thousands of phytochemicals and also have developed the technology to extract these chemical compounds and (ウ)concentrate them into pills, powders, and capsules. The term "dietary supplement" is often used to 21 natural compounds like phytochemicals.  Your body's nutritional needs are as unique to you as your appearance is. The first essential step toward wellness is							
to be sure you are getting the correct amounts of the proper nutrients. By understanding the principles of nutrition and knowing what nutrients you need, you can improve the state of your health, prevent disease, and maintain a harmonious balance in the way nature intended. Eating a healthful and balanced diet and supplementing your diet with appropriate nutrients will help to assure that your organs, cells, and tissues get the fuel they need to operate properly. 注*: toxins 毒素; carbohydrates, lipids 炭水化物,脂質; elasticity 弾力性; Phytochemicals ファイトケミカル(ポリフェノール 等の植物中の化学成分)							
1. For 17 - 21 in the passage, choose the most appropriate word or phrase from each list.							
17① as though② if only③ provided with④ whereas⑤ so that18① being composed② composes③ to compose④ compose⑤ component19① feed② sustain③ depend on④ undergo⑤ endure20① take place② carry out③ put out④ turn out⑤ pay off21① regard② grasp③ test④ prefer⑤ define							
2. What does (7)they refer to? Choose ONE answer from the list.							
22 ① our bodies ② all the abuse ③ environmental toxins ② poor nutrition, cigarette smoking, alcohol consumption, or inactivity ⑤ many years							
3. Look at the brackets   ① > -   ⑥ >, which indicate where the following sentence could be added to the passage. Choose a number from ①-⑥ that indicates where the sentence would best fit.							
≪ To keep this from happening, we need a proper diet and appropriate nutritional supplements. ≫							
4. For (4) [ ], arrange the phrases ①-⑤ to complete the sentence.							
If we do not give ourselves the proper nutrients, we can $(4)$ $\boxed{24}$ $\boxed{25}$ $\boxed{26}$ $\boxed{27}$ $\boxed{28}$ $\boxed{1}$ .							
① damage ② great harm ③ functions and ④ the body's normal ⑤ cause ourselves							
5. In the word (ウ)concentrate, which syllable is most stressed? Choose ONE from ①-③.							
29 (ウ) <u>concentrate</u> con - cen - trate ① ② ③							
6. According to the passage, which TWO of the following statements are FALSE?							
① The speed of nerve signals traveling through muscles can be up to 200 miles an hour. ② The form and function of each nutrient vary, but they are all essential to our health. ③ Losing weight is vital to keep our body functioning normally and properly. ④ We could be sick and yet have no obvious signs or symptoms of illness. ⑤ Organic raw foods contain nutrients our bodies need and most people don't eat enough of them. ⑥ Researchers discovered that some fruits and vegetables do not contain phytochemicals.
